

## Bellevue Botanical Garden Photo Walk

Think of an unusual angle, lighting or composition to photograph a common subject in an uncommon way.

The Bellevue Botanical Garden has a number of water features. Find an interesting approach to the subject of water.

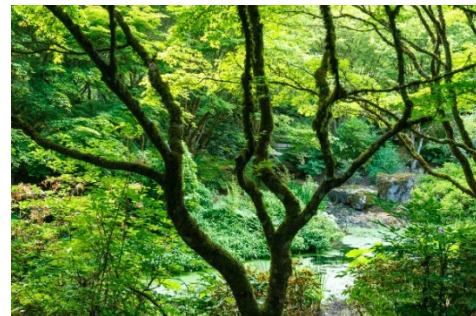

The gardens provide an oasis in the city. Many office workers, apartment dwellers and families use the park to get closer to nature. Look for a photo featuring people interacting with the garden.

One of the great things about Bellevue Botanical Garden is how the designers have created layers. As you walk around the garden, notice how you look through from one area to another. And, look for plants chosen for their ability to co-exist and contrast.

Create a photo featuring layers, textures or patterns in the garden

The Garden changes throughout the year. Create a photo illustrating a seasonal plant or emerging bloom.
